STEK

Your one-stop protection solution.

Paint Protection Film • Window Film • Windshield Protection Film • Coating & Car Care

STEK is a world-class film technology developer that caters to a variety of both corporate and consumer needs.

As experts in paint protection film, we lead the industry with our innovative manufacturing technologies. Our proprietary solutions are derived from our comprehensive understanding of films, adhesives, and top coats, supported by high investments in research and development. Taking root in the USA, we have grown to become a global supplier of automotive products, and aim to further expand our network under the STEK Automotive brand.

Today, STEK distributes unique, cutting-end technologies to OEMs, businesses, and individual consumers—all while building and strengthening diverse connections with partners across the globe. The mission of STEK, a portmanteau of Shield Technology, is to provide the highest degree of comfort and safety on all fronts—offering top-notch protection all the way down the road.

FORMULA

COATING | CAR CARE | PPF CARE

FORMULA QUARTZ

5-Year Warranty

Containing a specialized composite of nanoparticles inspired by hypersonic aircraft technology, **FORMULA QUARTZ** is a premium coating designed to create extremely durable bonds. A single layer on a clear coat provides robust resistance against abrasion, heat, corrosion, oxidation, and acids.

Combining silicon dioxide with complex carbon components, **FORMULA QUARTZ** effectively resists salt, abrasion, chemicals, and other unwanted substances.

01

Protects against
contaminants

FORMULA QUARTZ deepens the color of your original paintwork and preserves its natural gloss.

02

Preserves color
and gloss

FORMULA QUARTZ offers excellent water repellency and resistance to water spots thanks to its hydrophobic properties. As a self-cleaning coating, **FORMULA QUARTZ** also allows for the easy removal of hard stains.

03

Hydrophobic and
self-cleaning properties

FORMULA QUARTZ is a coating that protects the surface by penetrating directly into the clear coat layer of the vehicle's paint. It will be fully attached to the surface of the vehicle through chemical interactions to ensure maximum longevity.

04

Durable
molecular-level bonds

FORMULA QUARTZ YURI

1-Year Warranty

Want even more smoothness and gloss? Say hello to FORMULA QUARTZ YURI. Based on the technology used in our groundbreaking FORMULA QUARTZ, **FORMULA QUARTZ YURI** boasts even greater gloss-enhancing and hydrophobic properties than its predecessor, guaranteeing long-lasting, beautiful protection. Guarding against both environmental pollutants and paint scratches, our formula also cures quickly to provide a slick surface, resulting in trouble-free installation and a sheen that has to be seen to be believed.

STEK

DELIVERING SUPERB, CONSISTENT
VALUE THROUGH INNOVATIVE SOLUTIONS

STEK is a world-class film technology developer that currently supplies a wide range of solutions to the automotive, architectural, and healthcare sectors.

Beginning with experiments in adhesives and tapes, we've expanded to develop reliable, innovative products across different industries. Our products—ranging from paint protection films to ceramic coatings—are constantly tested and refined to maximize performance.

Today, STEK distributes unique, high-end technologies to OEMs, businesses, and individual consumers—all while building and strengthening diverse connections with partners across the globe.
